

## CHILDREN IN FINANCIAL HARDSHIP: OHIO

The number of children living in financially insecure households in Ohio continues to be systematically undercounted. According to the outdated Federal Poverty Level (FPL), 18% of children in Ohio (451,624) lived in poverty in 2022. Yet [United For ALICE](#) data shows that another 28% (725,635) were also growing up in financial hardship. These children live in households that are **ALICE**<sup>®</sup>: **A**sset Limited, **I**ncome **C**onstrained, **E**mployed, earning above the FPL but not enough to afford the basics in their communities.

With poverty-level and ALICE households combined, a substantial **46% of the nearly 2.6 million children in Ohio lived in a household with income below the [ALICE Threshold of Financial Survival](#) in 2022, ranking Ohio 23<sup>rd</sup> among all states and the District of Columbia** (with 1<sup>st</sup> representing the lowest rate of children living in financial hardship). These households don't earn enough to afford housing, child care, food, transportation, health care, technology, and taxes — the basics needed to live and work in the current economy.

### Children by Household Income, Ohio, 2022

Total Number of Children in Ohio = 2,550,190

*Note: This research uses the U.S. Census Bureau's American Community Survey [Public Use Microdata Sample](#) (PUMS) and focuses on children, whose ALICE status is determined by their household's income compared to local cost of living. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. This analysis does not include children who are unhoused or living in group quarters. In this Brief, percentages are rounded to whole numbers for ease of reading, which may result in percentages totaling 99% or 101%. All numbers are presented in the [ALICE Children Data Dashboard](#).*

Sources: ALICE Threshold, 2022; U.S. Census Bureau, American Community Survey, PUMS, 2022

### KEY FINDINGS 2022

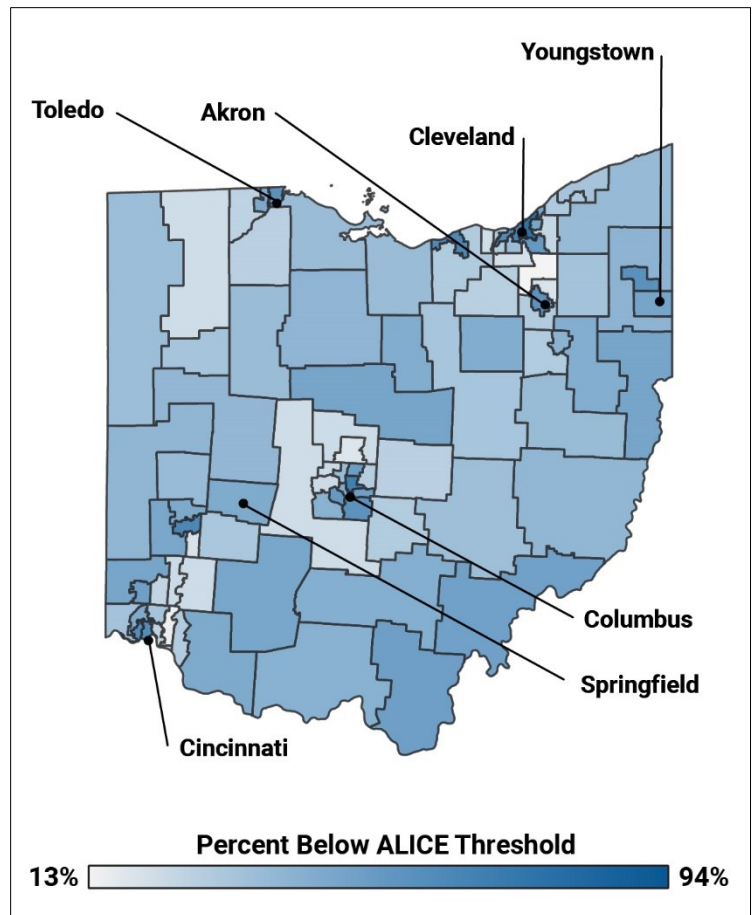

- Nearly half (46%) of children in Ohio lived in households experiencing financial hardship. While 18% were below the FPL, an additional 28% were ALICE.
- By race/ethnicity, Black and Hispanic children in Ohio continued to face greater hardship due to systemic barriers to financial stability: 75% of Black children and 60% of Hispanic children in Ohio lived in households with income below the ALICE Threshold, compared to 44% of Asian children and 38% of White children.
- Having working adults in the household did not guarantee financial stability: 27% of Ohio children in households with two adults in the labor force were still below the ALICE Threshold.
- Children below the ALICE Threshold often lacked access to crucial resources. More than 655,550 children below the Threshold in Ohio did not participate in SNAP, and nearly 222,525 had no high-speed internet access at home.

Since the first *ALICE in Focus: Children* brief (2019 data), the conflicting economic and social forces of the COVID-19 pandemic – inflation, wage growth, and the expansion and expiration of [pandemic public assistance](#) (especially relevant for households with children) – have impacted children and their families in various ways. As shown in our 2023 [ALICE in the Crosscurrents](#) Report, the situation for households below the ALICE Threshold improved in some respects and worsened in others, over the course of the pandemic and during its aftermath.

Yet despite these shifts, the share of children living in financially insecure households has remained largely unchanged at the state level. In 2019, 46% (1,170,686) of children in Ohio were below the ALICE Threshold. While the number of these children increased slightly to 1,177,259 in 2022, the rate of financial hardship remained the same (46%).

There are children below the ALICE Threshold in [communities across the state](#) (Public Use Microdata Areas, or PUMAs), at rates ranging from 13% in Summit County (North and Northwest), Hudson, Twinsburg and Macedonia Cities PUMA to 94% in the Cleveland City (East) and Bratenahl Village PUMA. Visit the [ALICE Children Data Dashboard](#) to see additional data (for 2019 and 2022) and an interactive version of the state map.

## Percentage of Children Below ALICE Threshold by PUMA, Ohio, 2022

Sources: ALICE Threshold, 2022; U.S. Census Bureau, American Community Survey, PUMS, 2022

## TERMS AND DEFINITIONS

- **ALICE:** Asset Limited, Income Constrained, Employed – households that earn above the Federal Poverty Level (FPL) but cannot afford the basic cost of living in their county. Despite struggling to make ends meet, ALICE families often do not qualify for public assistance.
- **ALICE Household Survival Budget:** The minimum cost of household necessities (housing, child care, food, transportation, health care, and technology), plus taxes, adjusted for different counties and household types. While the FPL for a family of four in Ohio in 2022 was \$27,750, the average bare-minimum cost of living for that family was \$78,420.
- **ALICE Threshold:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs. Children **below the ALICE Threshold** include those in poverty-level and ALICE households combined.

# WHO ARE CHILDREN BELOW THE ALICE THRESHOLD?

A child's start in life impacts their long-term health, wellness, education, and career. Family financial stability is one of the strongest [predictors of current and future well-being](#). Financial instability not only contributes to daily experiences of [stress, trauma, and hardship](#) in the present, but it impedes a child's opportunity for [future success](#), including higher education, a higher income, and long-term asset building.

Children below the ALICE Threshold in Ohio are those under age 18 living in households with income below the basic cost of living for their community. Children in Ohio's financially insecure households are from all locations and demographic groups; are of all ages; are born in the U.S. or abroad; are of all abilities; are of all races/ethnicities; and live with parents or guardians who are married or single, working or not working, and English-speaking or non-English-speaking.

## Demographics

The largest numbers of children below the ALICE Threshold were found in the state's largest demographic groups. Yet the rate of hardship ranged substantially across groups. **In Ohio in 2022:**

**Age:** There were 205,051 infants/toddlers (age 0–2 years), 146,187 preschoolers (3–4 years), and 826,021 school-age children (5–17 years) living in households

below the ALICE Threshold. The rates of financial hardship were higher for infants/toddlers (54%) and preschool-age children (53%) than for school-age children (44%).

**Race/ethnicity:** By number, children below the ALICE Threshold were predominantly White (656,290), Black (271,727), and Hispanic (104,126). Yet due to [persistent discrimination and systemic barriers to financial stability](#), the share of children below the Threshold was higher for some groups: 75% of Black children, 60% of Hispanic children, 54% of children of Two or More Races, 44% of Asian children, and 38% of White children were growing up in financial hardship.

**Disability status:** Children with a disability were more likely to live in households below the ALICE Threshold (61%) than those without a disability (45%). When any member of the household had a disability, 61% of children lived below the Threshold. When a parent or guardian had a disability, children were slightly more likely to be below the Threshold, at 64%.

**Nativity and language:** Of the 47,010 children in Ohio who were born outside the U.S. (2% of children in the state), 57% were below the ALICE Threshold, compared to 46% of those born in the U.S. Rates were even higher for the 49,677 children living in a family with limited English-speaking ability (2% of children in the state), with 75% below the Threshold.

## ALICE CHILDREN DATA DASHBOARD

The ALICE Children Data Dashboard includes interactive data on children living in hardship by:

- State, regional, and local geographies
- Demographic categories including children's age, race/ethnicity, disability, and nativity
- Household characteristics
- Children's access to key resources
- Data year (toggle between 2019 and 2022 for all variables)

# Household Characteristics

Most children in Ohio lived with at least one of their parents (biological or adoptive). Children may live with married or unmarried parents, single parents, grandparents, or guardians. Household composition — especially the number of working adults — has a substantial impact on children’s financial stability.

## In Ohio in 2022:

**Living arrangements:** The largest number of children below the ALICE Threshold were in married-couple households (518,357), followed by single-female-headed households (455,393). But the percentage of children below the Threshold varied by adults’ marital status and partnership type: 31% of children in all married-parent households (31% for different-sex and 38% for same-sex couples), 60% of children in unmarried-couple households, 53% of children in single-male-headed households, and 83% of children in single-female-headed households were growing up in hardship.

- **Children living with grandparents:** 10% of all Ohio children (264,917) lived in a home with a grandparent, which included both multi-generational households and households where grandparents

were raising grandchildren on their own. More than one-half (57%) of children in these households were below the ALICE Threshold.

**Household work status:** Most children (94%) lived in a household with at least one worker. As the number of workers in the family increased, the share of children below the ALICE Threshold decreased. In Ohio, 79% of children living with one adult who was working were below the Threshold; with two adults, one of them working, 62% were below the Threshold; and with two adults who were both working, 24% were below the Threshold. Among all families with two or more adults, two of whom were working, more than one-quarter (27%) of children were still below the Threshold in 2022, demonstrating that having working adults in the household does not guarantee financial stability.

While parents and guardians work in every sector, children below the ALICE Threshold are concentrated in families where adults work in occupations with low median hourly wages. These include some of the most common occupations in the state: For example, 62% of Ohio children with an adult working as a cashier earning a median wage of \$12.21 per hour, were below the Threshold in 2022.

## Children by Household Financial Status and Household Characteristics, Ohio, 2022

	TOTAL	BELOW ALICE THRESHOLD	POVERTY	ALICE	ABOVE ALICE THRESHOLD
<b>ALL CHILDREN</b>	2,550,190	1,177,259	18%	28%	54%
<b>LIVING ARRANGEMENTS</b>					
Grandparent Living With Grandchild	264,917	151,805	16%	41%	43%
Married-Couple Household	1,646,399	518,357	6%	25%	69%
Single-Female-Headed Household	551,452	455,393	46%	37%	17%
Single-Male-Headed Household	119,205	63,121	14%	39%	47%
<b>HOUSEHOLD WORK STATUS</b>					
One Adult, One Worker	345,258	273,023	40%	39%	21%
Two Adults, One Worker	549,442	341,478	22%	40%	38%
Two Adults, Two Workers	957,157	227,708	4%	20%	76%

Note: The groups shown in this figure overlap across categories (Living Arrangements and Household Work Status). “Grandparent Living With Grandchild” includes any arrangement where grandparents live with their grandchild, including where parents or other adults are present. For the Household Work Status category, the number of workers is defined as “workers in the family over the last 12 months” from when the survey was conducted. View more on the [ALICE Children Data Dashboard](#).

# INTERCONNECTED BARRIERS TO WELL-BEING

Children below the ALICE Threshold are more likely to lack stable housing, quality child care and early education, private health insurance, high-speed home internet access, and reliable food access. When basic necessities are at risk, families have to make impossible decisions — like choosing to pay for food or quality child care, for medicine or utility bills. Decisions made in one area of the budget can have both [short- and long-term consequences](#) that ripple across all other areas.

## In Ohio in 2022:

**Housing:** Children in families without stable housing face greater risks for [poor physical health, increased family stress, social isolation, and lower academic performance](#). Among children below the ALICE Threshold in Ohio, 52% were in families that rented and 48% were in families that owned their home. Below the Threshold, families of Black children had the lowest homeownership rate (25%), while families of Asian children and White children had the highest (58% and 59% respectively). Above the Threshold, the homeownership rate for families of Black children was higher (59%), but still substantially lower than for families of Asian (80%) and White children (92%). Overall, 46% of children in renter households and 16% of children in homeowner households were in families that were cost burdened, paying 30% or more of household income on housing.

**Education:** Of all preschool-age children in Ohio, 43% were enrolled in preschool, lower than the national average (47%). Preschool-age children below the ALICE Threshold were less likely than their peers above the Threshold to be enrolled in preschool (35% vs. 51%). School enrollment rates for teens age 15–17 below and above the Threshold were similar, with 95% below the Threshold enrolled compared to 97% of their peers above the Threshold.

**Health insurance:** Access to health insurance is critical to both [wellness and financial stability](#) for families below the ALICE Threshold, and [especially for children](#). While most children in Ohio had health insurance (95%, the same as the national rate), 5% of children below the ALICE Threshold (63,802) did not have coverage. Children in families with income below the Threshold were more likely to have public health insurance (59%), while those above the Threshold were far more likely to have private health insurance (88%).

**Home internet:** The availability of internet access and devices for education has become increasingly essential for young people, yet the [digital divide](#) by income and race/ethnicity persists. Most children in Ohio (97%) had home internet access. Internet access rates were similar for children below the ALICE Threshold compared to those above (96% vs. 98%), yet children below the Threshold were less likely to have access to high-speed internet, which is essential for work and online learning (81% vs. 88%). High-speed internet rates increased for all children in Ohio through the pandemic, from 80% in 2019 to 85% in 2022. Yet nearly 222,525 children below the Threshold in Ohio still did not have high-speed internet at home in 2022.

High-speed internet rates were slightly lower for some groups below the Threshold: 80% for Hispanic children and White children, 84% for Black children, and 87% for Asian children. By location, the percentage of children below the ALICE Threshold with high-speed internet access was highest in Hamilton County (East) PUMA and Columbus (Far Northwest) and Dublin Cities PUMA (both 100%), and lowest in Wayne County PUMA (49%).

**Food access:** Households with children living below the ALICE Threshold were more likely to have difficulty putting food on the table. According to the [U.S. Census Household Pulse Survey](#), in 2022, 20% of Ohio families below the Threshold with children reported that sometimes or often “children were not eating enough because we just couldn’t afford enough food,” substantially higher than the rate for those above the Threshold (3%).

**Public assistance:** For a [variety of reasons](#), public assistance does not reach all children in households that are struggling. While most children in poverty are eligible for assistance, ALICE children live in households that often earn too much to qualify. For example, the income eligibility threshold in Ohio for the Supplemental Nutrition Assistance Program (SNAP) is 130% of

the FPL. Even though all children in poverty should be covered by SNAP, in Ohio the program was utilized by only 71% of children in poverty (318,681) and a mere 28% of children in ALICE households (203,038) in 2022. Of all children below the ALICE Threshold in Ohio, only 44% participated. This left a gap of more than 655,500 children whose families were struggling to make ends meet but not participating in SNAP.

**Intersectionality:** For some children, multiple intersecting forms of discrimination and limited access to resources make household financial instability more likely. For example, 75% of Black children in Ohio were below the ALICE Threshold in 2022. For Black children with a disability, the rate went up to 83%; and if they lived in a renter household, the rate increased to 97%.

## ALICE IN ACTION DATABASE

**United For ALICE** is a driver of innovative research and action around financial hardship. The ALICE data and analysis are shared with United Ways, corporations, foundations, government, and nonprofits, to inform policy and promote positive change.

United For ALICE partners with Ohio United Way to bring this research to Ohio, and this work is sponsored by Ohio United Way in partnership with [United Way of Central Ohio](#), [United Way of Greater Cleveland](#), [United Way of the Greater Dayton Area](#), [United Way of Licking County](#), [United Way of Greater Stark County](#), [United Way of Summit & Medina County](#), [United Way of Greater Toledo](#), and [United Way of Trumbull County](#).

The **ALICE in Focus Series** utilizes ALICE measures – the Household Survival Budget and the ALICE Threshold – to analyze the U.S. Census Bureau's American Community Survey (ACS) Public Use Microdata Sample (PUMS). Each "Focus" in the series highlights a different demographic group. For more details about the methodology for the ALICE in Focus Series, go to [UnitedForALICE.org/Methodology](https://UnitedForALICE.org/Methodology).
